**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted **no n** the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John L. Rogitz on January 10, 2005.

This application has been amended as follows:

**In the specification**

Page 1, insert before the first line the sentence - - This application is a continuation of application serial no. 10/112,837 filed March 29, 2002 from which priority is claimed - -.

**In the claim**

Cancel claims 9 and 10.

***Allowable Subject Matter***

2. Claims 1 – 5, and 7, 8, 11 – 15 are allowed.

Art Unit: 2873

3. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 7, 8, 9, and 11, for example which include an image display apparatus having a pixel activation mechanism scanning the UV light onto the pixels in response to demand image and the mechanism including at least one grating light valve controllable by a processor to establish the demand image (claim 1); and plural GLVs controllable by a processor to establish a demand image (claim 7); and at least one beamsplitter receiving UV light from the source and directing respective UV beams to the pixel activation mechanism (claim 8); and at least one mask having plural excitation apertures defining respective pitches and the mask being interposed between the pixel activation mechanism and the display, the pitches between the excitation light apertures being established based on the locations of the respective excitation light apertures relative to the display (claim 11).

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**
